PROJECTS

FPS Aim Trainer

May 2021

- Created a quick paced aim trainer mini-game that displays targets with randomizing location and size that relocates itself if not hit within a certain time frame.
- Utilized a target counter, accuracy percentage display and total score once a set amount of targets are hit.

NuDeck

Sept 2024 - Dec 2024

- Developed a Gameboy-like system from scratch in a collaborative team project with 14 members and presented to an audience of 25+ peers.
- Designed an original game for the system including gameplay movement, mechanics and graphics using Unity and C#.
- Integrated Unity x86_64 Linux programs onto a non-x86_64 Raspberry Pi 4 ARM architecture using Box64 ensuring a compatibility gap between software.

NebuLuv | FullyHacks

April 2025

- Partnered with a team of 3 and developed a fully functional web application personality quiz with a romantic tinder-like matching system surrounded on given personality.
- Implemented interactive elements using managing user data to determine quiz outcomes using JavaScript and created an engaging user interface with structured content using HTML5 and CSS.

WORK EXPERIENCE

Front Desk Associate | Valley Fitness

Dec 2021 - Aug 2024

Modesto, CA

- Managed member sign-ups and account management, accurately processing payments and maintaining records while promoting and selling supplements and gym products, meeting sales goals and educating customers on product benefits.
- Provided excellent customer service assisting members with inquiries, issues and maintenance duties to uphold gym standards to ensure a welcoming, positive experience.
